## Carrier's New HAP v4.4 Overview

**Date:** 15 March 2010

This class presented by [Carrier Software Systems](#) focuses on LEED-NC EA credit 1, Optimized Energy Performance and Carrier's new Hourly Analysis Program (HAP) version 4.4. Participants will be provided with advanced HAP energy simulation techniques for LEED. These techniques are much easier to accomplish using the new HAP v4.4 with its LEED-NC EA credit 1 reporting capabilities. See how fast this program can assess EAc1 points with automatic Baseline Building rotations and with quicker system definition using the new "Equipment Wizard". This program makes Whole Building Energy Simulation according to ASHRAE/IESNA Standard 90.1-2004 requirements much faster and easier. Training includes a demonstration of baseline and proposed building energy analysis using the new features in HAP v4.4.

**Suggested Prerequisite:** Prior knowledge of HAP load estimating and energy simulation, LEED-NC EAc1 and ASHRAE 90.1-2004 Appendix G is highly recommended, but not required.

**Schedule:** 10:00 a.m. to 12:30 p.m.

**Tuition:** Free

### What's Provided?

Light snack and break refreshments.

### Free HAP 90-Day Trial Software

For those interested in Carrier's new HAP v4.4 but you don't have the software, 90-day FREE trial software can be provided prior to the session. Contact Eric Lum at [elum@carrierhawaii.com](mailto:elum@carrierhawaii.com) for ordering and installation details.

### Registration

Please contact Eric Lum at [elum@carrierhawaii.com](mailto:elum@carrierhawaii.com) to sign up for this Overview session.
